Ligero G4

modular + lightweight

The LIGERO G4 is the perfect seat for urban and regional buses: It is the lightest seat of its class - and with the largest possible modularity. Each component is connected with an innovative click system. This saves time and money during maintenance and repairs. The fact that the components of the LIGERO G4 can be replaced individually makes it especially environmentally friendly and robust. The components can also be recycled separately.

As the seating frame of the LIGERO G4 does not prescribe the height of the back rest, but instead the easily removable back cushion, it is possible to have different back rest heights. The material-saving modular design also has a positive impact on the weight: The LIGERO G4 weighs around 20 percent less than comparable models, making it the lightest seat in its class - this is also good for the environment, as less weight also means less fuel consumption. The automotive industry served us well for the design of the LIGERO G4: The seat resembles that of attractive, comfortable car seats and fits ideally into the ambience of modern urban and regional buses. With regard to covers, numerous different materials are available in addition to artificial and authentic leather, which is even made from recycled materials.

LIGERO G4 LOW

LIGERO G4 HIGH

PRODUCT FEATURES AND BENEFITS

- lightest seat of its class
- modular, kit system
- innovative click system
- environmentally friendly + robust
- components can be recycled separately
