modular + versatile + multifunctional

A folding seat that is extremely versatile and high quality!

With the new model VERSO, Kiel offers the right solution for all eventualities in a city bus. This type of seat is specially designed for the rear entrance area in order to create additional seats in this space which is normally used for prams and wheelchairs.

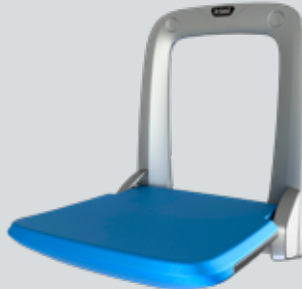

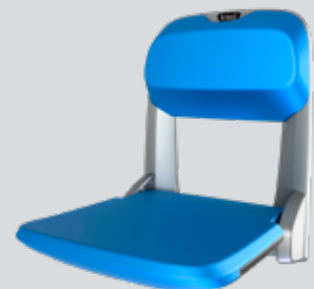

The modular system allows for a design in six variants - from a lean support to a comfortable folding seat, which can be locked up in the rush hour to create additional space. Many functions are available, such as a mechanical and electric lock and a warning light.

With its low weight, the seat meets the highest requirements in terms of efficiency and impresses overall with an extremely good price-performance ratio. In addition, the ergonomic backrest, the forward-looking design and the high-quality workmanship contribute to its appeal. Naturally, the model meets the current ECE R118-2/3 European flammability standard
