

Betaline Train

Long-distance travel |
the benchmark in its class

Betaline

luxurious + refined + state-of-the-art

The BETALINE was specifically developed for long-distance rail applications. Its ergonomic design delivers a high level of seating comfort, combined with a modern and refined aesthetic.

A dedicated technology concept further enhances functionality and supports the specific requirements of comfort-oriented long-distance rail travel.

The BETALINE is available in various comfort configurations for 1st and 2nd class.

MANUAL BACKREST AND SEAT ANGLE ADJUSTMENT

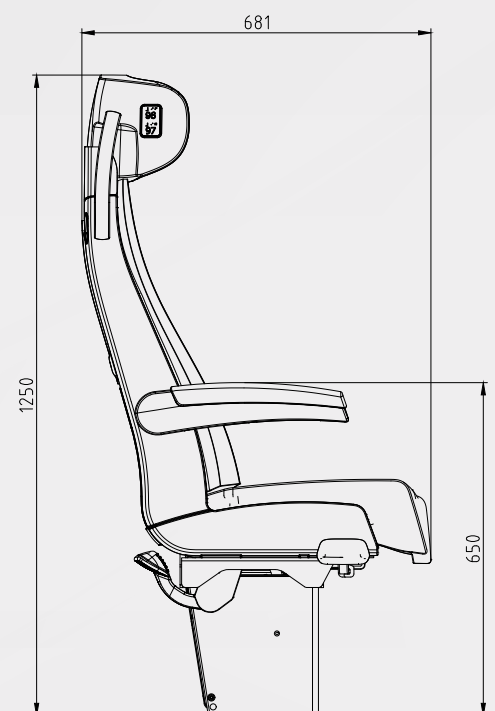

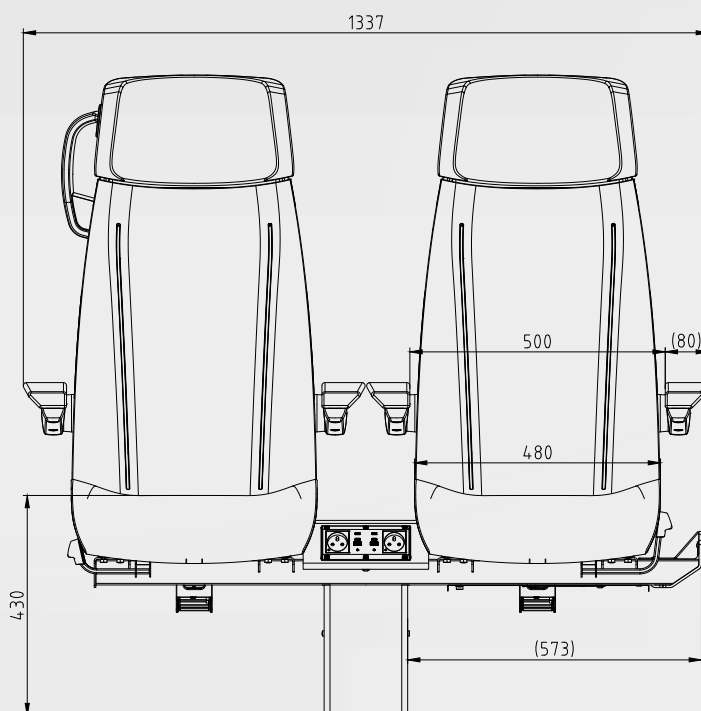

The BETALINE combines ergonomic seat geometry with premium upholstery to provide a high level of comfort, even on longer journeys. Pronounced headrest wings create a pleasantly sheltered space, offering passengers an enhanced sense of privacy.

Additional comfort is provided by an adjustable footrest, a folding table, an LED reading light, seat suspension and an integrated storage area. The combined backrest and seat angle adjustment allows the seating position to be adapted for enhanced comfort - with eleven adjustment positions in 1st class and nine in 2nd class.

A distinctive feature is the **synchronised headrest**, which follows the seat adjustment movement to provide ergonomically optimised support across different seating positions.
