# Match G3

## comfortable + stylish + modular

The MATCH G3 is the new generation of our modular passenger seating system for regional and long-distance trains. It combines high seating comfort, modern functionality, and cost-effectiveness with a weight-optimized, resource-efficient design. This makes the MATCH G3 a forward-looking solution for modern rail vehicles and a wide variety of applications.

The generously sized shoulder area of the backrest cushion ensures noticeable comfort. The wider folding table offers passengers additional storage space and enhances comfort during the journey. At the same time, the modular concept allows for flexible configuration to meet specific customer requirements.

All upholstery components can be quickly replaced as needed and are also available in a flame-retardant version. Thanks to its consistently weight-optimized design, a fully equipped double seat is approximately 12.5 percent lighter, and a double seat without additional features is even approximately 15.3 percent lighter than the MATCH G2. This reduces material usage and contributes to a lower carbon footprint.

### PRODUCT FEATURES AND ADVANTAGES:

- modern, modular seating concept
- wide range of configuration options
- maximum seating comfort
- weight-optimized design with up to 15.3% weight reduction
- cost-effective and resource-efficient solution with a reduced carbon footprint
